This is my new book scheduled to come out early in 2024.

The text and layout are basically ready, but for this release I am working hard on production - I would like this book to be not too large in size, light in weight, easy and inexpensive to send.

The title carries a specific meaning: this is a book about unusual designs detailed alongside traditional ones such as the great Japanese Rokkaku.

As always, I hope it will inspire the reader not simply to repeat but also to invent and imagine new possibilities.
